

GREEN COFFEE

# Information about our coffee capsules

- Pods are made from 100% compostable, GMO-free, bio-based material derived from sugarcane.
- We offer House, Light, Dark or Decaf pods, all of which also come in a refillable (and recyclable) tin.
- Practical capsule cardboard tube to store your capsules on your first purchase to refill as you go, our capsules are 100% compostable, Fairtrade, organic and plastic-free.

- Compostable coffee pods are an excellent eco-friendly solution for coffee enthusiasts who are concerned about waste. Because they are made from biodegradable materials that break down naturally over time, they can be disposed of in your food waste bin.

# Ways to recycle the capsules

- We can reuse the coffee capsules by using them as a pod. All the coffee nutrients needed for a healthy plant to grow remain in the pod.

- Also the used capsules and the left over coffee can be used as an fertiliser
